WORK EXPERIENCE

JavaScript Developer Nagwa Limited

03/2021 - Present

Cairo, Egypt

Tasks

- Write modern, performant, maintainable code for B2B and B2C projects.
- Work with different libraries and making it possible to use it with Arabic language, in other words, make it support RTL.
- Writing reusable, testable, and efficient code using JavaScript programming language for different purposes.
- Identifying design and cross browser problems and devising elegant solutions.

PROJECTS

Nagwa Readers Engine - Work Project

- Worked on the engine running the [Nagwa Readers](#) app that splits the stories content in multiple pages and provides controls to navigate in the story.
- Create a simple API to use all the app's features.
- Properly document the app's features and the API guides.
- Technologies: Vanilla Javascript, CSS.

Slippers React - Personal Project

- Website created using react and Typescript to replicate a famous E-commerce store.
- Technologies: React, Typescript, SCSS, Firebase.
- Live version: <https://slippers-react.web.app>.
- Github repo: <https://github.com/karimshalapy/slippers-react>.

CHATTZZY - Personal Project

- A chat website app where you can chat with random people all around the world.
- Technologies: React, Typescript, SCSS, Firebase.
- Live version: <http://chatttzy.web.app/>.
- Github repo: <https://github.com/karimshalapy/chatttzy>.

EDUCATION

Faculty of Metallurgical Engineering Suez University

2012 - 2107

Suez, Egypt
