WORK EXPERIENCE

Front-end Developer
Robusta Studio

05/2022 - Present   *Cairo, Egypt*

Achievements/Tasks
- Produced, maintained, and modified websites and user interfaces using Vue, Nuxt, Astro, Typescript, and React.
- Ensured websites were accessible across multiple platforms, including laptops and smartphones.
- Troubleshot and resolved website issues and bugs.
- Maintained and updated features for existing projects while introducing new ones.
- Developed showroom apps that increased total sales by 20% for clients.

JavaScript Developer
Nagwa Limited

03/2021 - 05/2022

Achievements/Tasks
- Wrote modern, performant, maintainable code for B2B and B2C projects.
- Worked with React, Typescript, Mathlive, and Slate.js to make bidirectional web apps and tools.
- Wrote reusable, testable, and efficient code using JavaScript programming language for different purposes.
- Identified design and cross-browser problems and devised elegant solutions.

PROJECTS

Vodafone Ta3limy - Work Project (11/2022 - Present) ⬈
- Maintained the old version of the app, and introduced new features to it incrementally.
- Fixed major bugs and UX issues.
- Maintained the old dashboard, and started migrating to a new one.
- Technologies: React, Typescript, PostCSS, Apollo.

Nagwa Readers Engine - Work Project
 (11/2021 - 04/2022) ⬈
- Worked on the engine running the app that splits the story's content into multiple pages and provides controls to navigate the story.
- Create a simple API to use all the app's features.
- Properly document the app's features and the API guides.
- Technologies: Vanilla Javascript, CSS.

Slippers React - Personal Project (07/2020 - 11/2020) ⬈
- Website created using react and Typescript to replicate a famous E-commerce store.
- Github repo: https://github.com/karimshalapy/slippers-react .
- Technologies: React, Typescript, SCSS, Firebase.
